

// TECH SHOWCASE 2026

Queensland Government's 2025-2027 NRL Magic Round Innovation Partnership

The National Rugby League (NRL) and the Queensland Government are driving their dynamic three-year Innovation Partnership, showcasing the highly anticipated NRL Magic Round. Together, they uncover cutting-edge technologies and implement innovative approaches to enhance rugby league and elevate the Magic Round experience.

The partnership is leveraging Queensland's strengths in key sectors and technologies to explore innovative applications for the NRL, such as advanced player performance tracking, enhanced fan experiences, injury prevention, and improved event operations and security.

In 2026, the collaboration takes another leap forward with the NRL signing on as a key partner of the LuminaX HealthTech Accelerator – strengthening connections between healthtech, performance and elite sport.

About the 2026 NRL Magic Round Tech Showcase

The 2026 Showcase highlights Queensland businesses leading the way in innovative technologies and solutions set to revolutionise the sports industry and major events.

This year's showcase features a broader range of cutting-edge advancements and creative approaches, including innovations from diverse sectors with the potential to drive significant impact and new opportunities within the world of sports.

This event is organised into two key streams: Sports Innovations, focusing on player performance and welfare, fan engagement, operational efficiency, and grassroots participation growth; and Platform Technologies, highlighting advancements in sustainability, connected infrastructure, smart venues, and digital consumer engagement.

Exhibitors

Meet the enterprises driving Queensland's innovation ecosystem.

Alt Group

Alt Group is a Brisbane-founded creative technology company operating globally across film, media, and emerging platforms. Through our innovation division T&DA, we develop next-generation tools and workflows that enable real-time content creation, scalable pipelines, and immersive audience experiences. Our work focuses on bridging creativity and technology to unlock new opportunities across sport, entertainment, and major events, supporting Queensland's innovation ecosystem and showcasing locally developed capabilities on a global stage.

Hormone Tracking System

Hormone Tracking System is a hormone intelligence platform built for elite teams, enabling frequent, on-demand hormone measurement through saliva testing. Using a compact reader and app, NRL clubs capture data at key moments, build player baselines, and identify patterns in readiness, recovery, and response to training. The system also forecasts energy trends, helping align athlete performance to key sessions and game-day demands, while integrating into high-performance programs across squads.

MyoIntel

MyoIntel is a sport technology company developing a digital twin platform that creates personalised, athlete-specific models powered by existing team sport data, including GPS-inertial units, training and match data. Our solution transforms external workload data into muscle-level internal load insights, enabling teams to optimise performance, reduce injury risk, and inform return-to-play decisions. With scalable personalisation from basic anthropometric profiles to medical imaging-informed models, we deliver actionable, data-driven insights for high-performance sport environments.

Dr Matthew Worsey | m.worsey@griffith.edu.au | 0479 083 191

Myriad Studios

Myriad Studios is a leader in film and game technology offering unique solutions for NRL:

1. Athletes – using digital twin technology to simulate player performance for training, coaching and rehabilitation.
2. Coaches – using film technology to access player biometrics, health, and behaviour.
3. Fans – use film technology to stimulate strong engagement, loyalty and sales.
4. Venues – use film technology to increase sponsorship returns and attendance.
5. Merchandise – create digital assets, gaming and virtual experiences.

Duncan Jones | duncan@myriadstudios.com.au | 0408 178 305
myriadstudios.com.au

PitchUp

PitchUp is a sports technology platform that connects players, clubs and communities with available sports facilities. By digitising the facility hire process for schools and councils, PitchUp unlocks underused venues and makes them easily discoverable and bookable by community sport. The platform reduces administration, generates new revenue for facility owners and improves access to safe, fit for purpose places to play, helping increase participation across Australia.

Tom Clark | tom@pitchup.com.au | 0411 297 519

Social Status

Social Status is a Brisbane based social media analytics platform trusted by marketers and sports organisations worldwide. Purpose built for social analytics and reporting, it delivers deep insight across organic, paid, competitor and influencer performance. In sport, Social Status analyses entire athlete, team and league ecosystems, enabling organisations to measure influence, engagement and growth at scale. The platform turns social media into a measurable performance channel for sport and sponsorship.

Tim Hill | tim@socialstatus.io | 0409 615 649

KNOWN

Uplift Logistics

Uplift Logistics is a Brisbane-based, global technology company specialising in chartered travel and coordinated accommodation logistics. Our SaaS platform manages end-to-end people movement for flights, ground transport, group accommodation and real-time coordination. Designed for high-performance sport and major events, Uplift removes the need for phone calls and spreadsheets. This is all designed to support efficient, reliable operations for teams, staff, fans and stakeholders.

Cameron Brown | cameronb@upliftlogistics.com | 0400 460 460

Valor Esports

Valor Esports is an award winning education technology company transforming digital engagement into human capability. Working across schools and youth pathways, Valor uses interactive esports and gamification technologies to develop cognitive skills, leadership and decision making. Its innovative analysis tools also adapt elite sports footage into interactive training and fan experiences, helping sports codes engage younger audiences and build future participation through digital first learning.

Sam Ward | sam.ward@valoresports.com | 0466 635 828
valoresports.com

Zest Element

Zest Element is an Australian food innovation company transforming surplus produce into high value, shelf stable ingredients. Working directly with growers, the company rescues fruit that would otherwise be wasted and converts it into consistent, scalable ingredients for retail, food service and manufacturing. Zest Element makes sustainability commercially viable, helping partners reduce environmental impact while improving efficiency and delivering high quality food experiences.
